Chuck Henley	N8LIV	Dave Beltz	W8BAYE

The C A R C meets the third Wednesday of the month at 7:30 PM.

NEXT MEETING IS JANUARY 16th at the EMERGENCY PREPAREDNESS CENTER.

HAPPY NEW YEAR

NEW MEMBERS

We would like to introduce you to the new members of the Canton Amateur Radio Club for fiscal year 1990-1991.

First, we have two that had complimentary memberships last year, from graduating from the Novice Class. They have now become members. WELCOME back George Dragovich K8BIRN from Uniontown and Scott Duncan II K8BIRP (son of Scott KK8D) from Canton.

A hearty WELCOME also to the following. Frank Pershing III N8DIW from Canton, Gary Jarrell K8BHSW from Massillon, Mary Ann Royer K8BIVS from North Canton, Evans (DAG) Daggett W8LVL from North Canton, Dan Mutigli N8LVO from Minerva, Jerry Kinsley N8MYJ from Canton, Pat Filimon N8NCZ from Canton, Harold Kimbel K8BQH from East Canton (who has been inactive for the last few years and a former member) and another former member Richard Ross K8ZQH from Massillon.

We hope you enjoy the fellowship of the members of CARC. Your ideas on what you feel would improve the club, will be most welcomed. Remember, this is the members club and input and ideas from all are needed. We have several Special Interest Groups (SIG's) that may interest you. These include Digital Communications, Home Brew construction projects, Transmitter Hunting and a couple others that have not gotten started as yet.

If you are interested, please ask about them.

This year, we will be celebrating CARC's Fiftieth Anniversary. Any ideas??

NO-CODE AMATEUR LICENSE

The FCC has announced that the code requirement for entry into the Technician class will be eliminated, possibly by February 1991.

The current Novice license will be retained. Current Technician class licensees will be grandfathered, so as not to lose any privileges (including those below 30 MHz).

The Technician written examination will remain 55 questions. Upon passing, applicant will have all Technician privileges above 30 Mhz. The new codeless Technician will, upon passing a 5-WPM code test administered by 3 accredited volunteer examiners, will be issued a Certificate of Successful Completion (CSCE), allowing them the same HF privileges as "old" Technicians. Volunteer examiners will be required to notify the FCC of the 5-WPM CSCE issued to "new" Technicians, so the FCC will have this information for enforcement purposes.

This will make four levels of Technician class licensees.

GRANDFATHERED TECHNICIAN - A Technician license issued before March 21, 1987. They receive credit for Elements 1(A), 2, 3(A) and 3(B).

CURRENT TECHNICIAN - Issued between March 21, 1987 and effective date of the codeless Technician license. Credit for Elements 1(A), 2 and 3(A).

CODELESS TECHNICIAN - Issued on or after effective date of R&O. Credit for Element 2 and 3(A).

NO-CODE TECHNICIAN PLUS CSCE for 1(A) 5 WPM, 1(B) 13 WPM or 1(C) 20 WPM telegraphy - Also a Novice who upgrades by passing 3(A) and an applicant that passes 5 WPM plus 2 and 3(A) at one sitting.

The VEC's (and FCC) are also looking for informal titles to the four Technician levels. Suggested are GRAND TECH, CLASSIC TECH, TECH LITE (or Codeless Tech) and TECH PLUS. Send your suggestions to Fred W5YI or to any VEC.

More complete details will be published in the February QST.

THE MAKING OF THE NEWSLETTER

Well, just what is involved??

As the deadline approaches (the first Wednesday of the month), you keep hoping you will receive several articles and at least the minutes will arrive on time. Then you can act like an editor and assemble the articles. This seldom happens.

You have to keep your eyes and ears open for upcoming events to put on the calendar. You produce the master calendar and get it to Adelaine Koyle (wife of Myron NBDHT) a week in advance, so she does not have to rush to get the copies made before publishing time. A SPECIAL THANKS goes to her for the time and effort she puts in producing your calendar, so you can glance at the calendar to see what is happening in our area. The calendar is for the following month, as the first two weeks are gone when you get the Feedline Bulletin.

Those articles never arrive, so now you have to change hats and become a reporter and writer. Golly, what can I write about this month?????

As publishing time arrives, somehow you manage (I still don't know how some months) to get what you have compiled, into the word processor. You run off a rough hard copy, make some corrections, give to my dear wife to make further corrections and you are finally ready to cut the stencils. Yes, we still use the old Mimeograph to do the printing, as it is still the lowest priced way to do printing.

Thanks to Doris WDBIKC for telling me a friend was able to cut stencils on a dot matrix printer. This sure saves a lot of typing (especially when you are not a typist) and the stencils are cut and ready.

During this time, you also find the time to update membership database and print out the labels. You check the calendar to see when you will have a few hours to do the printing. You set up the Mimeo, put on a stencil and start cranking out this month's CARC "FEEDLINE". About five to five and a half hours later, the printing is done, paper is assembled, copies stapled (so the Post Office will have a harder time to tear it apart and only send you the outer cover), fold and tape copy, put on labels, hand stamp return address, Hall of Fame stamp and Postal Permit stamp, sort and bundle by Zip Code, put in tray and sack, make out paper work and the FEEDLINE is ready to deliver to Bulk Mailing department at main Post Office in Canton.

A "SPECIAL THANKS" to the wife for all her help in producing "your" Feedline. Almost every month when I hand her the rough hard copy for her critical eye, I hear, "Not again! You mean it is that time already!" Then she proceeds with the proof reading.

Now, do you understand why I look forward to receiving articles from you members. It sure helps out the Editor and his Assistant!!!! Try writing and share your interests in the many interesting facets of AMATEUR RADIO. I am sure many of you would like to share something with your fellow members.

FOR SALE

Two Commodore C-64 computers, one is the C-64C.

A 1541 Disk Drive

A 1571 Disk Drive

A Star SG-10 Dot Matrix Printer

A TRS-80 Color Monitor

Two 1200 Baud Modems - one never used, still in original carton.
Both for the Commodore computer.

If interested, give Dave Beltz WDBAYE a call on 875-7210.

WANTED - A GOOD GENERAL COVERAGE RECEIVER. Could be a transceiver, even if transmitter does not work. If you have one you are willing to sell, please call Bob Breen W7JRH on 456-4022.

INTERFERENCE PROBLEM ELIMINATED

Thanks to Frank W8TUY and a team of Volunteer club members, a touchy interference problem has been eliminated and every one is happy.

After a few months of herringbone interference on one channel on the TV's in Aultman Hospital, it was diagnosed as coming from our repeater. Further investigation by Frank W8TUY, Denny K8NIB and Allan W18T (Hospital Electronics Technician), it was determined that the interfered channel amplifier was near the two meter frequencies. Further testing resulted in another amplifier, on a frequency away from two meters, was installed. CARC was asked to supply manpower to reprogram the TV's to the new channel. On Monday December 31st, Frank W8TUY with Allan W18T, Denny K8NIB, Bob N8AHJ, Bill K8JZN, Dag W8LVL, Paul K8HTR and Larry K8RMY made the change over. Results; interference gone.
